Discount програми				
Reserved	Yes. EC2 Reserved Instances offer up to 72% discount vs On-Demand for 1-year or 3-year terms. They are more configuration-specific than Savings Plans.	Yes, via resource-based CUDs. Google Cloud has resource-based committed use discounts for predictable Compute Engine resources.	Yes. Azure Reservations / Reserved VM Instances exist and can be used alongside Azure Savings Plans. Reservations are tied to selected instance family, size, and region.	N/A
Saving Plans	Yes. Compute Savings Plans offer up to 66% off On-Demand; EC2 Instance Savings Plans offer up to 72% off. Applies to eligible EC2, Fargate, and Lambda usage depending on plan type.	No direct "Savings Plans" equivalent. Closest equivalents are spend-based CUDs and resource-based CUDs.	Yes. Azure Savings Plan for compute offers up to 65% savings on selected compute services; Azure also has savings plans for selected databases up to 35%.	N/A
Committed Use	Not branded as CUD. AWS equivalents are Savings Plans and Reserved Instances.	Yes. Google Cloud CUDs are the main commitment-discount mechanism. They include resource-based CUDs and spend-based CUDs for eligible services.	Partially equivalent. Azure uses Reservations and Savings Plans rather than the "CUD" term. Savings Plans commit to hourly spend for 1 or 3 years.	No direct equivalent found. Hetzner pricing is typically positioned around simple low prices rather than long-term commitment discounts.
Ключові сервіси				
Compute	EC2, Lambda, ECS/Fargate, Elastic Beanstalk	Compute Engine, Cloud Run, App Engine, Cloud Functions	Virtual Machines, App Service, Container Apps, Functions	Cloud Servers, Dedicated Servers, Managed Servers
Kubernetes	Yes	Yes	Yes	N/A
Managed DB	Amazon RDS, Aurora, DynamoDB, Redshift, ElastiCache	Cloud SQL, Spanner, Bigtable, Firestore, AlloyDB, Memorystore	Azure SQL Database, Cosmos DB, Azure Database for PostgreSQL/MySQL, Cache for Redis	Not present first-party managed DB like RDS/Cloud SQL; only self-managed DB on VM
ML/AI	SageMaker, Bedrock, Rekognition, Comprehend, Textract	Vertex AI, Gemini API/Model Garden, AutoML, Vision AI, Natural Language AI	Azure Machine Learning, Azure AI Foundry, Azure OpenAI, Cognitive Services	Not present native ML/AI-platform; only self-hosted ML on GPU/server
CDN	CloudFront	Cloud CDN, Media CDN	Azure Front Door, Azure CDN	Hetzner Object Storage CDN / CDN for object storage
Identity/IAM	AWS IAM, IAM Identity Center, Organizations	Cloud IAM, Identity Platform, Cloud Identity	Microsoft Entra ID, Azure RBAC, Managed Identities	Projects, User roles, API tokens; simpler than IAM in AWS/GCP/Azure
Observability	CloudWatch, X-Ray, CloudTrail, Managed Prometheus/Grafana	Cloud Monitoring, Cloud Logging, Cloud Trace, Error Reporting	Azure Monitor, Log Analytics, Application Insights	Basic monitoring/metrics; ready-made app Prometheus + Grafana, but observability-platform less complexed
IaC support	CloudFormation, AWS CDK, Terraform provider, Pulumi	Terraform provider/modules, Deployment Manager, Config Controller, Pulumi	ARM templates, Bicep, Terraform provider/modules, Pulumi	Terraform provider, hcloud CLI/API, Ansible; MiniO Terraform provider for Object Storage

Доступність				
SLA	EC2: 99.99% regional SLA when instances run across 2+ AZs; 99.5% for a single EC2 instance.	Compute Engine: 99.99% for instances in multiple zones on Premium Tier in most regions; 99.9% for many single-instance cases.	Azure VMs: 99.99% high-availability SLA for supported high-availability VM deployments.	Cloud Servers: 99.9% monthly availability.
Number of regions / locations	39 geographic regions, 123 Availability Zones.	43 regions, 130 zones.	70+ announced regions.	6 cloud locations: Falkenstein, Nuremberg, Helsinki, Ashburn VA, Hillsboro OR, Singapore.
Multi-AZ support	Strong native Multi-AZ model; most standard regions have 3+ AZs.	Native multi-zone architecture; regions consist of zones; multi-zone Compute Engine SLA available.	Native Availability Zones in many regions; zone-redundant resources can survive a single-zone failure.	No hyperscaler-style managed AZ model; multiple locations/network zones exist, but HA architecture is mostly customer-managed.
EU regions	Standard EU regions: Germany, Ireland, Italy, France, Spain, Sweden; plus AWS European Sovereign Cloud in Germany.	EU regions include Belgium, Germany, Netherlands, Italy, France, Poland, Finland, Sweden, Spain; also London and Zurich in Europe but outside the EU.	EU regions include Austria, Belgium, Denmark, Finland, France, Germany, Greece, Italy, Poland, Spain, Sweden; also UK, Norway, and Switzerland in Europe but outside the EU.	EU-owned data center parks: Nuremberg and Falkenstein in Germany, Helsinki in Finland.
GDPR compliance	Supports GDPR compliance; AWS says customers can use AWS services to process personal data in compliance with GDPR and provides a GDPR-compliant DPA.	Supports GDPR compliance; Google Cloud provides GDPR resources and a Cloud Data Processing Addendum.	Supports GDPR compliance; Microsoft provides GDPR guidance, privacy commitments, and Data Protection Addendum / SCC mechanisms.	Hetzner positions its European cloud as GDPR compliant and provides a DPA; EU data centers are operated in Germany/Finland.
Підтримка				
Documentation	Very extensive official documentation, service guides, whitepapers, architecture guidance, AWS Well-Architected, AWS re:Post knowledge base. AWS Support docs also cover Support Center, Trusted Advisor, and Support API usage.	Very extensive official documentation, architecture center, best practices, troubleshooting guides, Cloud Skills Boost, community forums. Basic Support includes access to documentation and community support.	Very extensive Microsoft Learn documentation, Azure architecture center, troubleshooting docs, training modules, support plan documentation.	Good official docs for core products, APIs, networking, cloud servers, storage, DNS, etc.; smaller ecosystem than hyperscalers but clear practical documentation. Hetzner also has a dedicated Support Center and Docs entry point.
Certifications / compliance documentation	Very broad compliance portfolio. Includes ISO/IEC 27001:2022, 27017, 27018, 27701, 22301, 20000-1, 9001, and CSA STAR CCM v4.0; broader compliance programs are available through AWS Compliance and Artifact.	Broad compliance portfolio with access to ISO certificates, SOC reports, and self-assessments through Google Cloud Compliance Reports Manager.	Broad compliance portfolio via Microsoft compliance documentation and Service Trust Portal; includes offerings such as ISO, SOC, PCI DSS, and CSA STAR.	More limited but solid baseline. Hetzner states ISO/IEC 27001:2022 certification for its information security management system; certificates are available publicly.
Community	Very large global community: AWS re:Post, Stack Overflow, GitHub projects, blogs, events, user groups, partner ecosystem.	Very large community: Google Cloud Community, Stack Overflow, GitHub, forums, events, partner ecosystem.	Very large community: Microsoft Q&A, Tech Community, Stack Overflow, GitHub, events, partner ecosystem.	Smaller but active community. Hetzner Community provides tutorials and a forum for developers and users.
Minimum support plan	Basic Support is included for all customers. Paid technical support starts with Business Support+; AWS notes legacy Developer/Business/Enterprise On-Ramp plans are being discontinued on January 1, 2027.	Basic Support is included for all Google Cloud customers. Paid technical support starts with Standard Support, with a minimum spend of \$29/month or 3% of monthly Cloud charges, whichever is higher.	Basic support is available; lowest paid technical support plan is Developer, priced at \$29/month, intended for non-production or trial/evaluation environments.	No hyperscaler-style paid support tier ladder found. Support is mainly through Hetzner Support Center/tickets plus official docs and community resources.
Коли Що Обирати				
	AWS	GCP	Azure	Hetzner
Найкраще підходить для	Enterprise, глобальні продукти, складна інфраструктура, максимальний вибір сервісів	Data/AI/ML, Kubernetes, аналітика, cloud-native продукти	Enterprise, Microsoft stack, hybrid cloud, Active Directory / Entra ID	Простий hosting, VPS, dedicated servers, cost-sensitive проекти
Обирати, якщо потрібно	Найбільша екосистема сервісів, глобальна доступність, зріла IAM/observability/support база	Сильний AI/ML стек, GKE, BigQuery, хороша аналітика та developer experience	Інтеграція з Windows, Microsoft 365, SQL Server, корпоративна безпека та compliance	Низька ціна, проста інфраструктура, EU hosting, контроль над серверами
Не найкращий вибір, якщо	Потрібна проста й дешева інфраструктура без складного billing	Потрібна максимальна кількість enterprise-сервісів як в AWS/Azure	Не використовуєте Microsoft ecosystem або потрібен максимально простий cloud	Потрібні managed Kubernetes, managed DB, ML/AI, advanced IAM, enterprise support
Типові сценарії	SaaS, fintech, enterprise platforms, global apps, multi-region HA	AI/ML platforms, data warehouses, analytics, Kubernetes-first systems	Corporate IT, hybrid infrastructure, ERP/CRM, enterprise apps	MVP, dev/test, web hosting, small/medium apps, self-managed workloads
